Tinashe Zimbwa

ERP Consultant | Business Analyst

As a visionary leader, I'm on a relentless mission to create enduring value for teams, businesses, and society as a whole. My unwavering approach prioritizes people above all, followed by process refinement, and the strategic application of technology. With a firm belief in data-driven solutions, I've successfully overseen critical projects, ensuring they stay on course within time and budget. My diverse skill set enables me to excel at any level within an organization, delivering a harmonious blend of soft and hard skills that have been finely honed over the years. Let's embark on this transformative journey together.

Experience

2020 - Present

Ktizma | Pretoria, South Africa

Founder and Lead Consultant

- Founded and led a digital transformation consultancy delivering open-source ERP solutions to South African SMEs.
- Defined and standardised business processes, governance, and system functionality to support scalable implementations.
- Led strategy development and execution across delivery, operations, and marketing.
- Conducted solution discovery, requirements analysis, process mapping, and business process re-engineering.
- Designed solution architectures and led development teams through implementation and customisation.
- Delivered end-to-end ERPNext implementations, supported by Metabase and Nextcloud.
- Managed go-live readiness, change management, and post-implementation support to ensure operational continuity.
- Acted as a trusted advisor, aligning technology solutions with business objectives and measurable outcomes.

2022 - 2024

TransLution | Rivonia, South Africa

Implementation Consultant

- Conducted solution discovery sessions and developed a deep understanding of customer business processes to identify key pain points.
- Translated business needs into comprehensive Business Requirements Specifications (BRS) aligned with TransLution Software capabilities.
- Managed project planning and resource allocation, collaborating closely with Technical Consultants to ensure delivery aligned with the BRS.
- Led solution testing, trained client super users, oversaw go-live transitions, and monitored issue resolution.
- Mentored junior team members, contributing to team capability, consistency, and overall delivery success.

2018 - 2019

In2food Kempton Park, South Africa

Industrial Engineer

In2food produces about 90% of Woolworths food products. I was involved in the newly commissioned state of the art In2food factory in the following:

- SYSPRO(ERP) implementation in stock management.
- Waste elimination projects in various sections of the fresh produce factory and the prepared factory.
- Implementation of lean manufacturing in Produce and Prepared factory.
- Continuous improvement projects of various operations within the produce and prepared factories.
- Resource allocation optimization with the purpose of increasing the business margins.

Notable Achievements

- I have successfully carried out various process improvement and implementations projects in the manufacturing sector.
- I have been responsible for running a new production line (Kids Pizza), heading a team for 30 staff members. I oversaw the entire process from the acquisition of raw materials to the dispatching of finished goods.
- I worked for one year at a first of its kind Unilever Liquids factory in Boksburg South Africa, under the Wits-Unilever Engineering program as part of the pioneering group.
